## EXPERIENCE

### Indeed • Remote • Software Engineer

August 2022 - Present

- Used **React** to build modular micro frontends, using **Jest** and **TestCafe** to add comprehensive unit and integration testing for our projects
- Coded **microservices** in **Java (Spring Boot)** in order to build and maintain GraphQL endpoints
- Wrote multiple **design reviews** for prospective new features and performance improvements
- Fixed **performance** issues occurring for our largest accounts on the frontend, leading to a ~94% decrease in First Input Delay for users seeing the slowest load times
- Led multiple **epics**, including creating an NPM library to help other teams achieve the same performance improvements when rendering views of our team's product
- Advised the team on potential **accessibility** issues and proposed solutions, leading to a more accessible product
- Configured GitLab **CI pipelines** in order to allow for more comprehensive testing across our product suite

### InFlight Integration / Skuid • Remote • Software Developer

May 2021- August 2022

- Used **Angular** and **ASP.NET** to support both legacy and current projects
- **Modernized** legacy human management systems for multiple clients
- **Obtained credentials** to work with multiple government agencies after completing background checks.
- Provided **code reviews** for other developers at the company

### WSFS Bank • Wilmington, DE • Software Developer Intern / Software Developer

June 2019 - April 2021

- Transitioned department to **React** by creating reusable NPM packages, docs, and by training other developers
- Configured **NGINX** to proxy & serve content in development and production
- Designed and programmed the **front and backend** for a new internal application to respond to legal requests
- Helped team get started in the **cloud** by creating and securing **MongoDB databases** in Azure
- Utilized **Spring Boot** to write and update REST APIs for a few applications
- Created **Voices**, an internal tool to track and manage customer complaints

## SKILLS

### Proficient

HTML, CSS / SCSS, Javascript, Typescript, React, Angular, Java, Spring Boot, SQL Databases, NoSQL Databases, CI/CD Pipelines, REST APIs, GraphQL APIs, Microfrontend Architecture

### Working Knowledge

JQuery, Kotlin, Web Servers & Proxies, Azure, Google Cloud, AWS, Kubernetes, Microservices

## EDUCATION

### University of Delaware • Newark, DE • Bachelor of Science in Computer Science

August 2016 - December 2019 • **GPA:** 3.38
